

CONVERTED CHAPEL, KABER

Kaber Chapel was built in 1892 and is located in the unspoilt Eden Valley

It was sold for development in 2005.

References are available in relation to work on this project.

The renovation project was the responsibility of Architect owned Carrock Design & Build Ltd.

Insubond Ltd provided Sprayed Polyurethane Foam Insulation to timber sarking between and over roof rafters. Counter battens had been installed by the contractor to take plasterboard following installation.

Walls were prepared with waterproof render system K11 and insulation sprayed between metal/timber stud work. Walls were then dry lined with foil-backed plasterboard.

The Chapel has been converted into a luxury 'spa' vacation retreat with 5 bedrooms, 5 bathrooms, sauna, wooden barrel hot tub, study area, broadband internet, under floor heating throughout and Scandinavian style indoor grill.

Kaber Chapel has been available to rent since January 2008.
